ALLOWANCE

This action is in response to Applicant's amendment which was filed on 1/26/2010. Claims 1, 6, 11, and 16 are amended. Claims 2-5, 7-10, 12-15, and 17-20 were previously cancelled. Accordingly, claims 1, 6, 11, 16, and 21 are presented for further examination.

Allowable Subject Matter

Claims 1, 6, 11, 16, and 21 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant's claims are distinguished over the prior art by citing a novel system, method, and network for providing communications between a user and network that comprises a variety of computing elements including a client device, a server device which comprises a module for tracking sequences of navigational events of the single particular authenticated user and at least one unauthenticated user and a probability module. The probability module contains a feature for calculating probabilities for the desirability of links.

It is also important to note that the probability module also compares the probabilities to a predetermined threshold value which is associated with business rules which factor a level of risk of retrieving data that may not be used and an associated hardware cost of cache memory. The claims contain other important steps of the probability module. By combination of these steps, claims 1, 6, 11, and 16 now clearly and distinctly describe the important features of the image distribution process. Furthermore, the prior art gives no indication that it would have been

Art Unit: 2452

obvious to one of ordinary skill in the art to have tracked user actions and calculating probabilities of the desirability of links in the specific fashion presented in the claims.

.
Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
